DETAILED ACTION

Status of the Claims

1. Claims 20, 22-23, 25-29, 31, 33-34, 36 and 40-43 are pending.

Applicants' request for reconsideration filed on June 1, 2007 is acknowledged.

Applicants' response has been fully considered. Thus, claims 20, 22-23, 25-29, 31, 33-34, 36 and 40-43 are examined.

Information Disclosure Statement (IDS)

2. The references listed on the IDS filed June 1, 2007 (same as the IDS filed February 21, 2007) have been considered.

Withdrawn Claim Objections

3. The previous objection of claims 33 and 36 is withdrawn in view of applicants' response at pages 10-11 in the amendment filed June 1, 2007.

Withdrawn Claim Rejections - 35 USC § 103

4. The previous rejection of claims 20, 22, 23, 25-29, 31, 34 and 40-43 under 35 U.S.C. 103(a) as being unpatentable over Suzuki *et al.* (US Patent 6,197,326) in view of Igari *et al.* (US Patent 5,416,071), is withdrawn in view of applicants' response at pages 6-10 in the amendment filed June 1, 2007.

Examiner's Amendment

An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Denise Kettelberger on August 14, 2007.

Application/Control Number: 09/687,951

Art Unit: 1656

Examiner's Amendment to the Claims:

Claim 20 has been amended as follows:

20. (Currently amended) A method for administering a biologically active agent, the method comprising:

injecting to an animal a formulation comprising:

- (a) an injection vehicle comprising hyaluronic acid dissolved in a physiological buffer at a concentration of about 0.01 to about 3 percent weight per volume; and
- (b) particles comprising:
 - (i) a first component that is the biologically active agent; and
 - (ii) a second component that is a biocompatible polymeric matrix, wherein the concentration of the polymeric matrix is about 1 mg/mL to about 500 mg/mL of formulation.

The following is an Examiner's Statement of Reasons for Allowance: The following references appear to be related to the claimed invention. Suzuki et al. (US Patent 6,197,326) teach an intra-articular preparation for the treatment of arthropathy, which comprises microcapsules of a biocompatible, high molecular weight substance such as PLGA, homopolymer or copolymer of lactic acid, glycolic acid and caprolactone, and a drug such as cyclosporin; and the microcapsules can be administered in the form of injection by suspending it in a dispersion medium such as water, where a buffer, NaCl, hyaluronic acid, or chondroitin sulfate or salts thereof can be added. However, Suzuki et al. does not teach the concentration of hyaluronic acid is about 0.01 to about 3% (w/v) in a physiological buffer, and the concentration of a polymeric matrix is about 1 mg/mL to about 500 mg/mL of formulation. Igari et al. (US Patent 5,416,071) teach a pharmaceutical composition suitable of injection comprising erythropoietin (Examples 1-11) or other biological agents such as NGF (Example 12) and hyaluronic acid, where hyaluronic acid, a high molecular weight compound which is known to be biodegradable and pharmacologically injectable at the concentration of 0.01 to 3% (weight to volume). However, Igari et al. is silent on the microcapsule component such as a polymeric matrix used in the formulation. Since the two references either alone or in combined do not teach or suggest the injectable formulation comprising (a) an injection vehicle comprising hyaluronic acid dissolved in a physiological buffer at a concentration of about 0.01 to about 3% (w/v), and (b) a particle comprising a biologically active agent and a biocompatible polymeric matrix, where the concentration of the polymeric matrix is about 1 mg/mL

Application/Control Number: 09/687,951

Art Unit: 1656

to about 500 mg/mL of formulation. Therefore, the claims are allowable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chih-Min Kam whose telephone number is (571) 272-0948. The examiner can normally be reached on 8.00-4:30, Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathleen Bragdon can be reached at 571-272-0931. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
